

Benefits to Students & Faculty

Pre-Rotation Preparation

Students and Faculty have access to all required orientation information and paperwork prior to arriving at the clinical site, allowing faculty to arrive ready to teach and students to arrive ready to learn.

Students and Faculty in ACEMAPP have a profile and a unique ID to track EMR access, badging, parking, and emergency contact information. Profiles may collect school or site-specific custom fields to track additional data.

24/7 Access

ACEMAPP is an intuitive online tool that is accessible from any browser. Students and Faculty can easily access immunization documents and certifications, as well as their clinical rotation history. Schedule details are always available and changes are seen in real time.

Security

ACEMAPP never sells or shares personal information for marketing purposes. Rest assured that all data is secured using SSL-228 bit encryption and is hosted in a HIPPA compliant, SSAE-16 SOC-2 and SOC-3 certified data center. Additionally, ACEMAPP keeps data secure by

- Securing, encrypting and monitoring access points
- Utilizing custom non-reversible password hashing algorithms
- Performing routine penetration, vulnerability, malware, and virus checks
- Utilizing multiple redundant backups (on and off-site)
- Restricting access to system data via employee policies
